NOTICE OF ALLOWANCE

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/12/2007 has been entered.

This is an Examiner's Amendment and Notice of Allowance in response to Amendment filed 3/16/2007.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas K. Scherer, Registration No. 45,079, on April 11, 2007.

Claims 9 and 10 have been amended as follows:

Claim 9. A test method used for a test apparatus including a plurality of test modules, connected to either of ~~the~~ a plurality of devices under test, for supplying a test signal to the connected device under test, and a plurality of control apparatuses for controlling the plurality of test modules, and a connection setting section for switching topology of the plurality of control apparatuses and the plurality of test modules, the connection setting section being connected with both the plurality of control apparatuses and the plurality of test modules, comprising steps of:

acquiring a connection switching setting data indicating which one of the plurality of ~~site~~ control apparatuses is to be connected with each of the plurality of test modules;

connecting each of the plurality of control apparatuses with the plurality of test modules based on the connection switching setting data ~~so that~~ for connecting each control apparatus ~~is connected~~ with the plurality of devices under test; and

controlling the plurality of test modules by the connected control apparatus and testing the plurality of devices under test in parallel.

Claim 10. A The test method used for a the test apparatus as claimed in claim 9, wherein said connection switching setting data vary from at least one of the number of terminals of each of the devices under test, arrangement of the terminals of each of the devices under test, kind of the terminals of each of the devices under test and kind of a test of each of the devices under test.

Allowable Subject Matter

Claims 9 and 10 are allowed. Claims renumbered 1 and 2.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior arts of record taken alone or in combination fail to teach, anticipate, suggest or render obvious the claimed invention, including among other limitations, a connection setting section connected with both the plurality of control apparatuses and the plurality of test modules, as recited in the independent claim 9.

Consequently, Claims 9 and 10 are allowed over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
